

Class 5 Dose Dispensing Hoods

- The Class 5 Dose Dispensing Hood is designed to economically assist nuclear medicine departments with compliance of USP Pharmaceutical Compounding-Sterile Preparations.
- This ultra-compact table-top hood provides an **ISO Class 5 (old Class 100) environment** and is designed around the Mini Table Top L-Block (PTI-016) and the Beta Gamma Table Top L-Block (BG-TS).
- (Note: L-Block shields are not included)

CLASS5-MT

CLASS5-BG

The hood is constructed of stainless steel with clear polycarbonate sides. Each side has an ample hole for easy hand insertion. The sides are hinged on the bottom and fold down to allow easy cleaning of the hood. A top-mounted HEPA filter and fan assembly is included to provide the ISO Class 5 environment. Air is exhausted via openings in the front, back and sides.
